PROPERTY GUARDIAN PROGRAM

Nobody Knows the Future, But You Can Prepare for It!

The Property Guardian Program (PGP) is a tool for property and facility managers who choose to be proactive rather than reactive when it comes to business disruption or interruption from water, fire or storm damage or the discovery of mold or other biohazards.

The PGP is designed to offer a variety of levels of service and commitment, allowing each property or facility manager to "curate" or customize a program that works best for them and the facilities they are responsible for.

The PGP establishes a relationship between the property or facility manager and a restoration contractor who will function as a Disaster Preparedness Advisor and provide mitigation and restoration services according to the specifics of the PGP.

The Property Guardian Program is ideal for property managers, facility managers, property owners, risk managers and other responsible parties that not only see the value in being proactive but also:

- Want the fastest, most efficient response and recovery when a loss occurs,
- Are laser focused on lowering restoration costs, which are typically unbudgeted,
- Know that outstanding communication is the key to a smoother, lower stress restoration scenario,
- Value comprehensive documentation to enhance the insurance claims process as well as to protect themselves and all involved parties from future liability and lawsuits,
- Appreciate vendors that practice discretion to avoid a potential public relations nightmare, and,
- See why having priority response locked in before a disaster is an essential requirement of their role in protecting the operations of the organization.

Commercial properties are at risk from a wide variety of natural and man-made emergencies such as:

- Water damage from floods, freezing, burst pipes, sprinkler heads, appliance failures, sewer backups, etc.
- Fire or smoke damage
- Severe storms, hurricanes, tornadoes or wind damage
- Discovery of mold, trauma scenes or other biohazards

Having a PGP in Place If & When an Emergency Strikes, will:

- Contain and minimize the damage and reduce the severity of the loss
- Reduce the number of occupants out of the property
- Dramatically reduce the possibility of lost tenants
- Give property management staff a better understanding and control of the restoration process
- Get the property back to normal operations fast, with less stress
- Protect the health and safety of employees and occupants
- Minimize interruptions to business operations
- Prevent or minimize loss of income
- Reduce the cost to restore the property
- Address Public Relations issues and protect your reputation
- Enhance tenant/ owner relations
- Protect the public safety

PROPERTY GUARDIAN PROGRAM

Nobody Knows the Future, But You Can Prepare for It!

In the event of water, fire, storm or other damage requiring emergency services it is important to obtain mitigation services as quickly as possible in order to reduce severity of damage, control costs and return to normal operations as quickly as possible.

This pre-authorization acknowledges that GCPRO Restoration has been thoroughly vetted and is approved to provide emergency services work in the event of water, fire or storm damage to the property listed below or properties listed as part of this document.

The Emergency Response Program (ERP) Pre-Authorization is made by and between (Owner)

_____with facilities located at

_____

and GCPRO Restoration. *(Any additional locations or facilities should be listed on the attached sheet.)*

With This Pre-Authorization:

We Will Create a Plan for When Disaster Strikes

- We will create an Emergency Response Program (ERP) for the properties listed.
- Having specific disaster planning information about your property on file at our office allows us to respond faster and more effectively due to our prior knowledge of your facility and the information we have on hand regarding your building(s), personnel, operations, etc.
- When you have an emergency this plan will inform you as to:
  - What to Do
  - Who to Call
  - What to Expect
  - Your ERP will be on file online for 24/7 access by our team and your team.
- Check with your insurance agent as your ERP may even help you obtain discounts on your General Liability insurance.

You Will Receive Priority Service

- Under normal conditions, when an emergency occurs, we will respond to initial notification of the emergency within 15 minutes and will arrive on-site within 2 hours barring extenuating circumstances such as traffic, etc.
- During a severe, area-wide weather event, our “next available crew” service pledge means that we will provide priority response to all ERP (Preferred) clients with the next available crew before any other non-ERP service requests are fulfilled.

PROPERTY GUARDIAN PROGRAM

Nobody Knows the Future, But You Can Prepare for It!

We Will Begin Emergency Services Immediately without Requiring a Deposit

- We will respond, execute a service agreement and begin emergency services immediately without an initial deposit being required. This will allow us to respond immediately to losses after hours or on weekends without delay.

We Will Mitigate and Prevent Further Damage

- We will mitigate the loss including board-up and tarping, water extraction, structural drying, providing restorative cleaning as well as other appropriate actions to stabilize the situation and prevent further damage.
- To accomplish this we will provide a variety of resources including labor, equipment, materials, tools and other necessary items as needed.
- We will supply personnel trained in accordance with Occupational Safety and Health Administration (OSHA) and the Institute of Inspection Cleaning and Restoration Certification (IICRC) standards.
- We will have appropriate commercial general liability, pollution liability and workman's compensation insurance coverage.
- Our company and our employees will keep all information pertaining to your operations and the emergency situation confidential, unless otherwise required by law or to protect life, health or safety.

During a Loss We Become Your "Claims Administrator"

- We will provide transparency through regular updates so that any third party can see what the source of the loss was and what steps are being taken to restore it such as Regional Managers, distant property owners and Claims Adjusters. This allows you to stay updated on the progress of restoration without being inconvenienced and creates a permanent record of proper restoration.
- As your "Claims Administrator" we will help you manage the process and provide the highest levels of communication.
- Our "Mitigation Focused, Full Service" approach will control costs and return you to normal operations faster.
- Our comprehensive documentation and working to the *Standard of Care* will help assure you that the work was done correctly and protect you from liability.

Post-Loss Debriefing

- We will offer a thorough debriefing after any emergency to review what happened and why, examine whether additional preventive measures should be implemented as well as review the restoration in terms of process, equipment utilized, costs, documentation and other details.

Certificate of Professional Restoration

- We will provide a Certificate of Professional Restoration that documents the loss was properly restored according to the *Standard of Care* by a licensed, certified and professional restoration contractor.
- This protects the property's value, protects against "sick building" issues (real or imagined), enhances tenant retention and protects against downstream liability.

PROPERTY GUARDIAN PROGRAM

Nobody Knows the Future, But You Can Prepare for It!

We Will Always Be There for You as a Resource!

This ERP is a living document designed to change with you and your business and it is recommended that it is updated annually.

The information you provide to us that is included in the ERP will enable us to respond and take action whenever any of these types of emergencies arise. We are also available to help or provide guidance during any emergency, small or large.

Having the ERP in place should provide a greater sense of security as a demonstration of your preparedness and that you have engaged a company dedicated to the on-going operation of your facility and that is there for you before, during, and after a loss.

Yes, I would like to be a part of the Property Guardian Program!
